## **ACTION PLAN**

### **Month 1: Planning and Preparation**

- Week 1-2:
  - Establishing a project dissemination team, assigning roles and responsibilities.
  - Preparation of a schedule of communication activities.
- Week 3-4:
  - Develop a communication and dissemination strategy, taking into account different channels and target groups.
  - Development of an initial list of local media and potential partners.

### **Month 2: Preparation of Materials**

- Week 1-2:
  - Creating promotional materials (eg brochures, graphics, infographics).
  - Commencement of work on the first draft of the promotional film.
- Week 3-4:
  - Continuation of work on promotional materials, improvement and adaptation to needs.
  - Determining the final draft of the promotional video.

### **Month 3: Commencement of Communications**

- Week 1:
  - Preparation of information to be published on partners' websites and in local media.
- Week 2-3:
  - Participation in local events, meetings and presenting the project to the local community.
- Week 4:
  - Finalization and release of the final version of the promotional video.
  - Start of publication on the project's social accounts (Facebook, Instagram).

### **Month 4: Communications continue**

- Week 1-2: Kontynuacja publikacji na mediach społecznościowych, angażowanie zainteresowanych.
- Week 3-4:
  - Preparation of additional graphic materials and social media entries.

### **Month 5: Conferences and Workshops**

- Week 1:
  - Participation in a methodological conference, presentation of project achievements.
  - Beginning of organization of workshops for teachers in IX LO.
- Week 2-3:
  - Continuation of work on workshop materials and presentations.
- Week 4:
  - Preparation and distribution of information materials for conference participants.

### **Month 6: Workshops and Local Promotion**

- Week 1-2:
  - Organization of workshops for teachers in the 9th Secondary School, collecting opinions and feedback.
- Week 3-4:
  - Active promotion of participation in the "Open Doors" event of IX LO.
  - Start planning workshops for students in Greece.

### **Month 7: Online Expansion**

- Week 1-2:
  - Start of activity on the project's YouTube channel, publication of the first video materials.
  - Continuation of posting on social accounts, responding to comments.
- Week 3-4:
  - Creating new promotional and educational videos on YouTube.

### **Month 8: Online Expansion continues**

- Week 1-2:
  - Continuation of creating video materials on the YouTube channel.
  - Starting activity on social platforms (Instagram).
- Week 3-4:
  - Prepare short videos to share on Instagram.

### **Month 9: Workshops in Greece and International Expansion**

- Week 1-2:
  - Organization of workshops for students in Greece, promotion of the project abroad.
- Continuation of publications on educational platforms.

- Week 3-4:
- Continuation of international activities, contact with partners abroad.

#### **Month 10: International Expansion continues**

- Week 1-2:
- Continuation of international activities, making materials available on educational platforms.
- Week 3-4:
- Continuation of activity on the project's social accounts.

#### **Month 11: Project Completion**

- Week 1-2:
- Latest updates on the project's social media platforms.
- Completion of work on promotional and educational materials.
- Week 3-4:
- Development of a report on dissemination and communication activities.
- Preparation of materials summarizing the project.

#### **Month 12: Summary and Conclusion**

- Week 1-2:
- Summary of achievements and presentation of effects.
- Week 3-4:
- Finalization of the final report.
- Continuation of activities on the project's social accounts.

#### **TARGET GROUPS:**

1. Local community: Residents of the local community, parents of students, local institutions, local media.
2. Teachers and principals of the 9th Secondary School: Teachers interested in new teaching methods, school principals.
3. Students of IX LO: Students of school age, interested in the subject of the project.
4. Workshop participants in Greece: Teachers and students from the foreign partner.
5. Education Workers: Teachers interested in new educational tools.

Communication Channels:

1. Social Media: Establishment and active maintenance of accounts on social media platforms such as Facebook, Instagram, YouTube. Publishing educational content, promotional videos, news from the project.
2. Project website: Creation of a dedicated project website, containing information, downloadable educational materials, schedule of events.
3. Local Media: Sending press releases to local newspapers, radio and TV stations. Opportunity to give interviews and publish articles.
4. Conferences and Workshops: Active participation in local conferences, educational seminars and organization of own workshops and meetings.

#### Key Actions under the Strategy:

##### 1. Informing the Local Community:

- Press releases in local media.
- Presentations at local meetings and events.
- Posters and leaflets distributed in local public places.

##### 2. Communication with Teachers:

- Presentations to teachers about the benefits of using the project results.
- Personalized workshop invitations.
- Constant e-mail and telephone contact.

##### 3. Student Involvement:

- Short promotional and educational videos on social media platforms.
- Competitions related to the subject of the project (eg art works).
- Interactive presentation sessions at school.

##### 4. Workshops in Greece:

- Direct communication with workshop participants.
- Cooperation with foreign partners in the promotion of the event.

##### 5. Cooperation with Educational Staff:

- Sharing materials on educational platforms (OER Commons, EPALE).
- Special online sessions for teachers from other schools.

##### 6. Social Media and Website:

- Regular content publishing: videos, infographics, articles.
- Interact with users by replying to comments and messages.
- Promoting events and workshops.

##### 7. Monitoring and Analysis:

- Tracking reactions and engagement on social media.
- Analysis of content reception, adjusting the strategy based on the results.

## **IX Liceum Ogólnokształcące** im. Kazimierza Jagiellończyka w Toruniu

1. Methodological conferences for teachers of the Toruń region: The project materials were presented at two conferences that brought together teachers from the Toruń region. During these meetings, the project coordinator and team members had the opportunity to present the results of iSafetyapp, discuss the goals of the project and present the tools and resources developed within the project that can be used by teachers to increase students' awareness of online safety.

**22.09.2023 - 24.09.2023**

EDUKACJA 7

iSafetyApp

## Nowe horyzonty edukacji: Zalety nauki za pomocą gier i aplikacji internetowych

Edukacja jest nieodłącznym elementem rozwoju społeczeństwa, a wraz z postępem technologicznym i rosnącym znaczeniem Internetu, metody nauczania również ewoluują. Coraz częściej wykorzystuje się gry i aplikacje internetowe jako skuteczne narzędzia edukacyjne, które angażują uczniów i ułatwiają przyswajanie wiedzy. Jednym z najnowszych projektów, który wykorzystuje tę innowacyjną metodę, jest iSafetyApp, stworzona w ramach programu Erasmus+ we współpracy z IX Liceum Ogólnokształcącym im. Kazimierza Jagiellończyka w Toruniu oraz partnerami z Cypru, Grecji i Wyższą Szkołą Ekonomii i Innowacji w Lublinie (WSEI).

Aplikacja iSafetyApp to rewaluacyjne narzędzie edukacyjne, które ma na celu uczenie młodzieży zasad bezpiecznego korzystania z Internetu poprzez interaktywny escape room. Ta innowacyjna forma nauki oferuje uczniom nie tylko zdobycie wiedzy, ale także rozwijanie umiejętności logicznego myślenia, rozwiązywania problemów oraz pracy w zespole. Wykorzystując gry, aplikacje i interaktywne wyzwania, iSafetyApp angażuje uczniów w proces nauki i dostarcza im atrakcyjnych doświadczeń edukacyjnych.

Projekt iSafetyApp, którego koordynatorem jest IX LO im. Kazimierza Jagiellończyka w Toruniu, jest odpowiedzią na rosnące zagrożenia związane z Internetem. Młodzież spędza coraz więcej czasu online, dlatego istotne jest, aby umiała rozpoznać i unikać potencjalnych zagrożeń. Aplikacja iSafetyApp, w połączeniu z zaangażowaniem nauczycieli i współpracą międzynarodową, stwarza skuteczne narzędzie do nauki bezpiecznego korzystania z Internetu.

Partnerzy z Cypru, Grecji i WSEI w Lublinie przyczynili się do różnorodności projektu i wzbogacili go swoim doświadczeniem i wiedzą. Wspólnie opracowali materiały dla nauczycieli, takie jak scenariusze lekcji i materiały filmowe, które ułatwiają wprowadzenie tematyki bezpieczeństwa online do programu nauczania. Dzięki temu iSafetyApp oferuje holistyczne podejście do nauki, integrując zarówno technologię, jak i edukację.

Pan Piotr Drajkowski, dyrektor IX LO, podkreśla znaczenie nauki opartej na grach i aplikacjach: "Korzystanie z gier i aplikacji internetowych w edukacji jest obecnie niezwykle ważne. Tego rodzaju narzędzia nie tylko angażują uczniów, ale również rozwijają ich umiejętności krytycznego myślenia, rozwiązywania problemów i współpracy zespołowej. iSafetyApp jest doskonałym przykładem, jak można wykorzystać potencjał technologii do nauki ważnych umiejętności, takich jak bezpieczne korzystanie z Internetu."

Projekt iSafetyApp nie tylko wpływa na edukację młodzieży, ale również promuje współpracę międzyuczelnianą i wymianę doświadczeń. Partnerstwo z instytucjami z różnych krajów umożliwia uczniom i nauczycielom zdobycie nowych perspektyw i spojrzenia na zagadnienia bezpieczeństwa w Internecie.

Współczesne metody nauczania oparte na grach i aplikacjach internetowych otwierają nowe horyzonty edukacji. iSafetyApp jest przykładem innowacyjnego podejścia, które angażuje młodzież i daje jej niezbędne umiejętności w dzisiejszym cyfrowym świecie. Poprzez połączenie edukacji z technologią, projekt iSafetyApp przyczynia się do budowania świadomego i bezpiecznego społeczeństwa online.

Aby dowiedzieć się więcej o projekcie iSafetyApp, odwiedź stronę internetową IX LO im. Kazimierza Jagiellończyka w Toruniu.

Erasmus+

4. Interview on Radio Gra: The project coordinator gave an interview on Radio Gra, which allowed to achieve even greater coverage in the local community. The interview focused on the goals of the project, its benefits and how it contributes to raising awareness of online safety and supporting mathematics education.

<https://gra.fm/o-bezpieczenstwie-w-internecie-przy-pomocy-aplikacji-projekt-ix-lo-w-toruniu.html>

5. A spot promoting the results of the project was broadcast on the Polish radio station Gra.

<https://my.visme.co/view/w49v3m11-isafatyapp>

6. Workshops for teachers focused on digital security and the use of modern technologies in the education process, including teaching mathematics – 5.06.2023. During this workshop, teachers had the opportunity to learn about the tools and resources created by the project that can help them conduct lessons related to online safety and mathematics. Participants of the workshop learned how to share knowledge about online threats, teach mathematics in an interesting way, what are the latest trends in cyber security and how to effectively engage students in education on this topic. The workshop was an interactive platform for exchanging experiences and best practices in teaching about online safety and mathematics, and motivated teachers to further develop their skills in this area.

7. Open Day – 23.04.2023: As part of the dissemination of the iSafetyapp IX LO project, the results of the project were presented during the "Open Day"- a special event during which the school invited the local community, parents, students and representatives of other schools to see the effects of the project . "Open Doors" was an excellent opportunity to present various activities carried out as part of iSafetyapp, such as educational workshops, multimedia presentations and film screenings. Participants had a chance to get to know the goals of the project, familiarize themselves with the available educational tools and consult the project coordinator and teachers who actively participated in its implementation. "Open Doors" created a favorable environment for the exchange of knowledge and experience, and also emphasized the school's commitment to educating about online safety not only among its students, but also in the entire local community.

- IX LO, which is the project coordinator, actively promoted iSafetyapp on its website, school Facebook profile and through other communication channels, e.g. YouTube. For example:

12. Publications on the EPAL platform.

<https://epale.ec.europa.eu/en/content/new-horizons-education-benefits-learning-games-and-online-applications>

13. Creation of a YouTube channel for the publication of video materials created in the project.

[iSafety App - YouTube](#)

## 1. Short summary of the partner activity regarding dissemination

Describe activities regarding the visibility of the project (social media, organisation's website, dissemination and visibility events etc.)

During the implementation of the iSafetyApp project, WSEI University carried out several activities related to promotion of the project:

- preparation of promotional materials:

animations

[Fake News - educational video - YouTube](#)

[Grooming - educational video - YouTube](#)

[Phishing: educational video - YouTube](#)

brochures

- WSEI published information about the project on the official webpage:

<https://www.wsei.lublin.pl/projekty-rozwojowe/projekty-miedzynarodowe/isafetyapp-teaching-students-internet-safety-through-an-artificial-intelligence-mobile-application/>

- WSEI published an information about the project at the website of the International Projects and Cooperation Centre: <https://international.wsei.eu/en/projects/>

- WSEI published 3 dissemination videos at the facebook profile of ISAAC EU Project of the International Projects and Cooperation Centre:
  - <https://www.facebook.com/watch/?v=7101027243247311>
  - <https://www.facebook.com/watch/?v=300235742406617>
  - <https://www.facebook.com/100075085691947/videos/660081022666069>
- WSEI added posts about the project at ISAAC EU Project Facebook channel:

- WSEI promoted the official iSafetyApp website, Facebook page, hashtags etc.
- WSEI published the educational video materials at official University website;
- WSEI published all materials developed within the project at WSEI e-learning platform, with the access for all students and staff of the University and for the external users.

- WSEI printed 200 leaflets which were distributed to WSEI visitors in the lobby and on the information boards
- Dissemination activities were also made through direct communication, such as face to face meetings.

WSEI experts translated dissemination materials prepared by other partners (videos, infographics, leaflet) into Polish language and distributed among listed below target groups:

- Students of WSEI University
- Students of High School of WSEI University
- Students of Academic High School of Sports Championships of WSEI University
- WSEI’s employees, educators, experts, psychologists and other specialists
- informal target groups, such as parents, students relatives from Lubelskie region
- Project partners in other EU projects who WSEI is cooperate with within other EU projects on the similar topic.

For dissemination activities WSEI was using: WSEI’s website, WSEI’s Facebook page, face-to-face meetings with caregivers, leaflets and newsletter.

**2. Short description of your organisation’s dissemination strategy.**

What dissemination strategy are you planning to follow in order to reach the expected persons involved in project activities?

WSEI university will follow the dissemination activity plan given by the project coordinator as well as use our own good practice that WSEI staff developed while working on various EU projects.

Grooming is a hot topic these days, but what is it exactly? According to the [Cambridge Dictionary](#) grooming is the criminal activity of becoming friends with a child in order to try to persuade the child to have a sexual relationship.

Check out our video and the [iSafetyApp](#) project to learn more on how to stay safe in Internet!

Have you heard of the [iSafetyApp](#)?

WSEI University, collaborating with Innovation Frontiers IKE, IX Liceum Ogólnokształcące im and Technologos Research and Innovative Services Ltd has made a game that will measurably increase the ability of students to stay safe on the internet.

This learning approach is beneficial for students to have and teachers bring in, a different approach in a formal school setting. The game's diverse nature can be a tool to acquire essential skills untaught in everyday school programs yet still support them in their class work.

Download the game here: <https://play.google.com/store/apps/details...>

Have you heard of phishing? No, it's not a typo!

Phishing is a cybercrime in which attackers deceive people into revealing sensitive information or installing malware such as ransomware

Check out the website dedicated to this Internet safety threat and if you want to know more, visit our [ISafetyApp](https://isafetyapp.eu) project, where we plan to develop an app to teach students and their parents on how to be safe online.

More information:

# T.R.I Technologos Research

## Short summary of the partner activity regarding dissemination

1. Describing activities regarding the visibility of the project (social media, organisation's website, dissemination and visibility events etc.) Finally, the company has updated the social media accounts of the project several times and is intending to continue doing it.
2. T.R.I Technologos Research and Innovation Services is determined in disseminating the project intensively. Hence, during the first months of the project the company has created accounts in popular social media, such as Facebook. Additionally, the company has created the material about the project that was added in the company's website.
3. Moreover, we have designed and developed a promo video that presents the project scope and activities, as well as a leaflet that can be disseminated in various events.

Innovation Frontiers

Mind is the limit

1. **Project website:** The creation of a dedicated project website was a focal point for communication and access to information. On the website you can find a description of the project's objectives, information about available educational tools, downloadable materials and news related to the project. This is the central point that gathers all iSafetyapp information in one place.

<https://isafetyapp.eu/>

2. **Participation in an international conference iCERi - 16th annual International Conference of Education, Research and Innovation**

Panagiotis Psomos, representative of Innovation Frontiers, has been registered to participate and speak at the international conference "Transforming education, Transforming Lives", which will be held in Seville (Spain) on November 13-15, 2023. <https://iated.org/iceri/?fbclid=IwAR1PNUg5HTZ4wiJaKnDRuHd1WYH-HVLJivCWnWKgjH06IOIXcJqm7eb5hw>

**ABSTRACT ACCEPTANCE LETTER**

This is a confirmation that the abstract entitled:

**"DESIGN, DEVELOPMENT & EVALUATION OF A SERIOUS GAME ON INTERNET SAFETY"**

*Author(s): Panagiotis Psomos*

has been accepted as a VIRTUAL presentation at ICERI2023.

**Name of event:** ICERI2023 (16th annual International Conference of Education, Research and Innovation)

**Dates:** 13th-15th of November, 2023

**Place:** Seville (Spain)

**Organising entity:** IATED

- 3. Organization of the Multiplier Event 28.04.2023:** The organization of its own Multiplier Event, i.e. a meeting with the participation of a wide audience, allowed to increase the visibility of the project in the local community. During this event, the project could be presented to a wider audience, which contributed to the dissemination of its ideas and goals.

Project: ISafetyApp:Teaching Students Internet Safety Through an Artificial Intelligence  
 Mobile Application  
 Project number: KA226-A73BCECE  
 Multiplier event details:  
 Event host organization: Innovation Frontiers  
 Date and place: 28.04.2023, Athens, Greece

Funded by the Erasmus+ Programme of the European Union

It may not be possible to ask to destroy an image that has already been used. This is especially important when the images are used to publish materials that IFIKE has to store - for example an annual report. I confirm that I understand that my photos can be used as described above and that I agree to the processing of my personal data.

- 5. Organization of workshops for students in a friendly school 15.05.2023:**  
Organizing educational workshops for students, which were carried out in a friendly school, allowed for a direct impact on a group of young people from a different environment. This enabled the expansion of the project's reach and the sharing of knowledge and tools in the field of digital security.

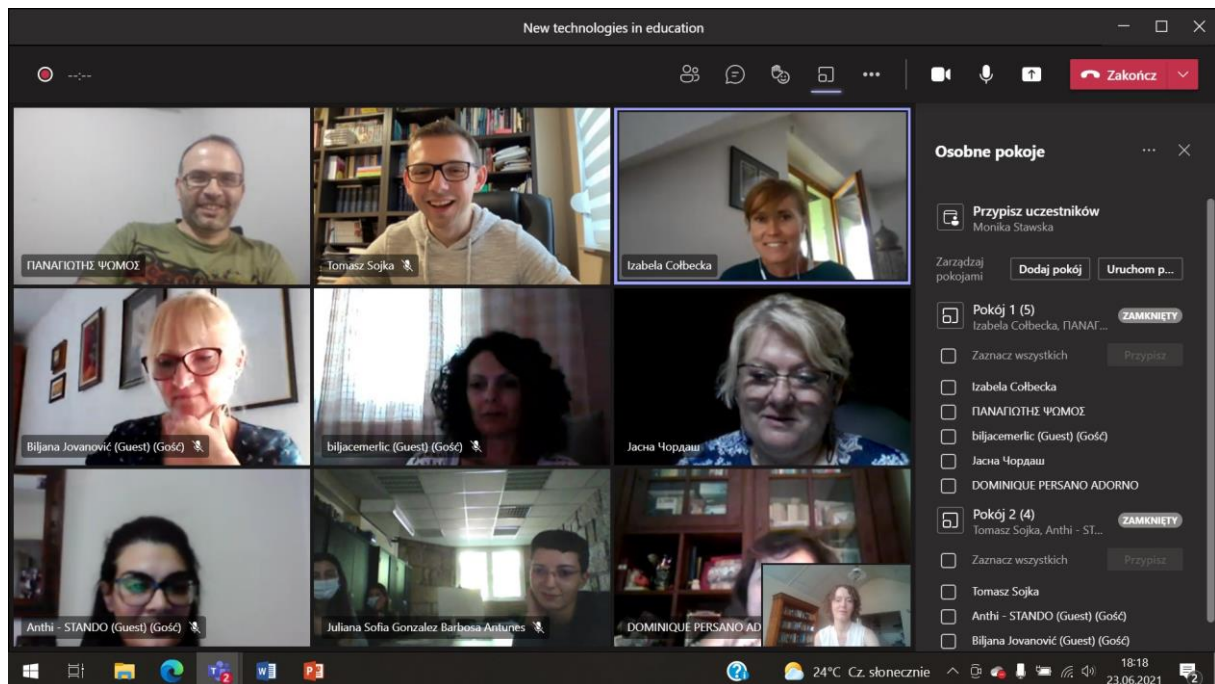

6. **Promotion during meetings related to the implementation of other projects:**

Participation in meetings related to the implementation of other educational projects allowed for the presentation of iSafetyapp in front of other groups of teachers and educators. This created the possibility of knowledge exchange, integration and inspiration between various initiatives.

7. **Organizing an online meeting for teachers – 3.11.2022:** Conducting an online meeting for teachers was an effective way to reach people from another country. This meeting enabled the sharing of knowledge and experience on Internet security, as well as expanding the network of contacts between educators from different places.

Co-funded by the  
Erasmus+ Programme  
of the European Union
