1. INTRODUCTION

The purpose of this report is to present the process of continuous evaluation of the iSafetyApp project "Teaching Students Internet Safety Through an Artificial Intelligence Mobile Application" in terms of the implementation of the Intellectual Output result 3 (IO3) titled: Teacher Training courses materials, to make sure that the project actually met the objectives initially set and that the expected results were achieved. The aim is also to solve arising problems in advance.

All partners were asked to answer each question and to justify a given answer in the comment box. It was also a great help in preparing the report to be communicative and precise and to give specific examples where possible.

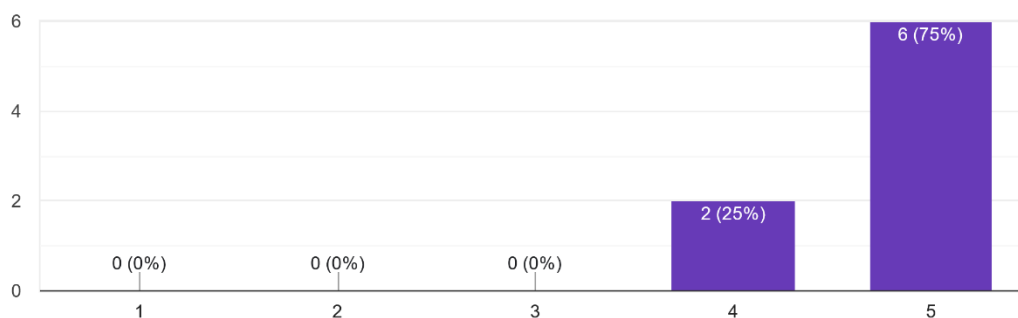

The data collected in the report covers the works related to the implementation of IO3 between: 01.06.2022-29.06.2023. The survey was completed by two employees from each partner's organisation - one from the "substantive" point of view and the other from the "organizational" one. Below is a report summarizing all responses.

2. To which extent the produced output IO2 satisfies your expectations?

To which extent the produced output IO3 satisfies your expectations?

8 odpowiedzi

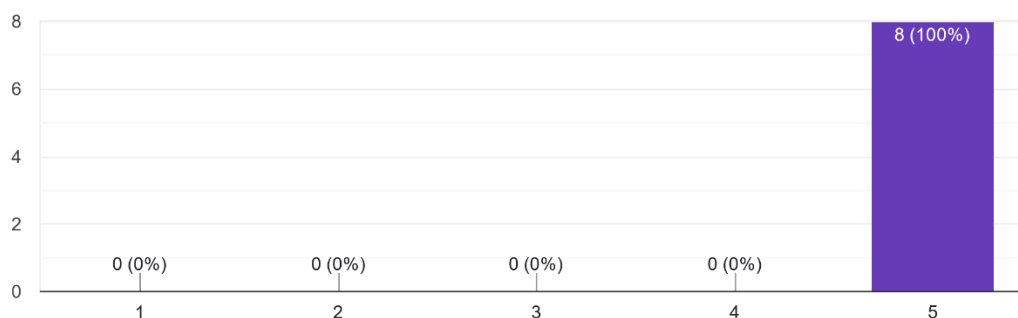

For the Teacher Training courses materials, partners were asked to assess on the scale from 1 to 5 the satisfaction from implementation of IO3.

Most of the partners indicated that the IO3 result satisfies their expectations, but the answers show that some partners from the project consortium sees a space for the improvements. Two partners rated their satisfaction o level 4 out of 5.

3. How useful do you think it is to the general purpose of the project?

How useful do you think it is to the general purpose of the project?

8 odpowiedzi

For the Teacher Training courses materials, partners were asked to assess on the scale from 1 to 5 the usefulness of IO3 result to the general purpose of the project.

All partners answered that the app is very useful for the project purpose. It shows that the educational materials are the basis of the whole project and they have important role in teaching the Internet safety among students.

4. Which concrete use do you think it can find in your organization?

For the Teacher Training courses materials, partners were asked to give an examples of how the IO3 could be used in their organisations. Partners answered as follows:

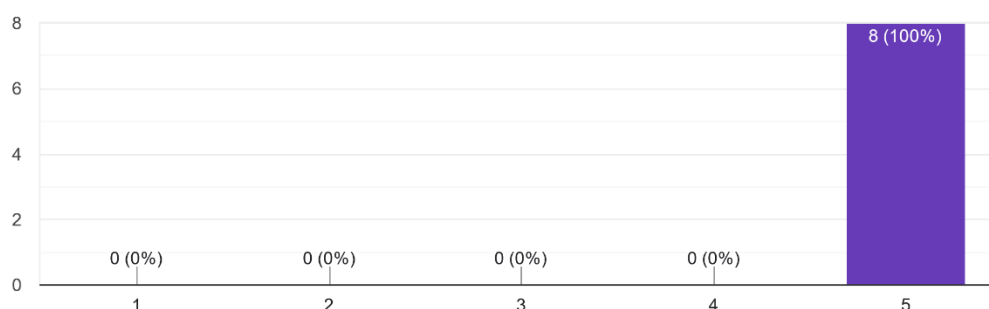

- During classes
- Plenty; during class with students and for students of pedagogy & IT
- for the children and students from local schools
- informational for teachers and students
- education of the students
- for students and teachers; for promotion of the internet safety
- education
- for students and people teaching others

The above answers show clearly that the most important use is the educational one – for students and teachers. The partners are planning to use the developed materials (graphic, texts and videos) in their everyday work, during classes and activities with students.

5. How useful do you think it is for the next project stages?

How useful do you think it is for the next project stages?

8 odpowiedzi

For the Teacher Training courses materials, partners were asked to assess on the scale from 1 to 5 the usefulness of IO3 result to the next project stages.

All partners unanimously voted that the developed materials are very important for the next stages of the project implementation.

6. Please, comment on your answer to the previous question. In which ways you see the full output potential?

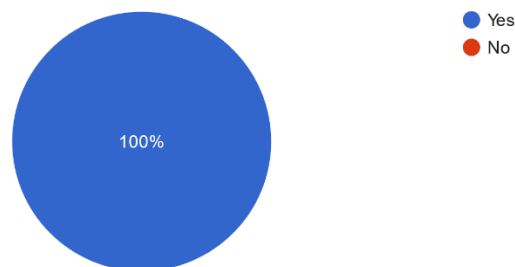

For the game app development and evaluation, partners were asked to give an examples of ways they see the full IO2 output potential. Partners answered as follows:

- teaching young people on how to use Internet safely
- the materials are a great knowledge pill for anyone, who wants to broaden the knowledge on the internet safety
- the videos, graphics and the text materials are extremely important as they gather all knowledge on this topic and give a methodology for the teachers
- It can give users a wider perspective on Internet safety
- used during classes and promotional activities of the project
- promotion of the internet safety among students; teachers; parents; the knowledge on how to be safe online
- this materials sum up the whole iSafetyApp project
- promotion of the internet safety on the national level

7. Do you think the time dedicated to the output elaboration was enough?

Do you think the time dedicated to the output elaboration was enough?

8 odpowiedzi

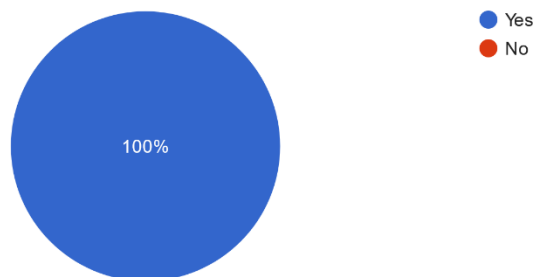

This time partners were asked to assess if the time dedicated to the output elaboration was enough. 100% of the partners replied that the time was definitely enough.

8. Do you think that the most competent partner was assigned to produce the output?

Do you think that the most competent partner was assigned to produce the output?

8 odpowiedzi

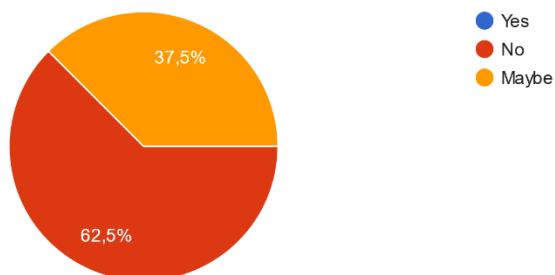

For this question partners were to assess if the partner assigned to produce the output was the most competent one. All partners (100%) agree that the chosen partner was the most competent one.

9. Do you think the output might be improved in some way?

Do you think the output might be improved in some way?

8 odpowiedzi

This question was to assess by partners if they see any ways to improve the developed IO3 output. This time the answers were varied between no and maybe. Most partners (62,5%) answered that there

is no need to improve the developed educational materials. Second largest group of answers was „maybe” (37,5%). It shows that generally, the developed materials satisfy partner’s needs and expectations.

10. In case if you see space for improvement in regards of output IO2, what do you suggest to be done?

According to the previous question, this time partners were asked to give examples of ways to improve the IO3 result. Partners answered as follows:

- n/a
- no
- all good!
- Some text bugs
- Maybe some graphics in videos could be improved, however overall everything looks great

11. Any additional comments you may have..?

This time partners were asked to give additional comments regarding the implementation of the IO3 result. Partners answered as follows:

- n/a
- no
- all good!
- Some text bugs
- Maybe some graphics in videos could be improved, however overall everything looks great

12. SUMMARY

This questionnaire showed that partners are generally satisfied with the IO2 result – Teacher Training courses materials. They see the importance and the full potential of the developed materials to be used mostly for the educational purposes, during classes with young students or as a methodological knowledge base for teachers.

Partners however see also that on this level of the materials development, there are some small corrections necessary, however none of the comments related the core of the materials.
